

HIGH-SPEED CONTROL PLATFORM

FEATURES

- **Versatile, Precise Controls** – standard with Informer™ series control system
- Industrial processors with industry-leading speed
- High-speed automation platform to multiple processors and I/O
- Adaptive tuning servos; anti-vibration; anti-resonance
- High-speed fiber optic network for extreme noise resistance
- High-resolution 4 mil p/rev encoder with absolute position feedback
- Extremely fast frequency response servos at 2500 Hz for shorter positioning time
- Integrated drive safety – safe “torque off” function in every servo amplifier and VFD motor
- Innovative GOT with expanded internal memory and SD card backup
- Unlimited recipe storage
- Intuitive Graphical Interface

OPTIONS

- VNC server function – connect to and view or control the HMI from any authorized smart phone, tablet or PC
- Multilingual HMI support
- Biometric operator authentication

RUN WITH CONFIDENCE
